

**Making \$20+ / Daily  
from Yahoo Answers  
with only 15 minutes  
work.**

## Introduction

This report is created towards people who are new and have no very much experience in online business, but will also help advanced online marketers.

First off I am going to relevant my way, that I have earned around \$20+/daily, using a affiliate program to promote Weight Loss Products. Don't worry you would need much writing skills, just basic English and some ideas (how to make people to buy your product). I would also say that you will need around \$25 to start off, no other investment is required.

Basically this investment is required to:

- Buy a domain name
- Purchase 10 unique articles

Yeah I know someone now is going to say that 10 articles doest cost \$20, but you are wrong (I am going to tell you where you can purchase unique hand written articles for price of \$2/each, later on) I will suggest you NOT to use any software to write your articles, because the content is becoming useless and not understandable for the visitors.

\$20 isn't much to invest is it ? - you can make your investment in the first day that you started if you just follow my steps below.

## Before we get Started

Before we get Started I will recommended you to join some of the following affiliate networks.

<http://www.MoreNiche.com>

<http://www.GenBucks.com/>

<http://www.LeadingEdgeCash.com>

All of the programs above are tried by me and all of them pay to their affiliates on time.

## Getting Started

I think that you have already joined the affiliate programs above and now is time to choose your product, that you are going to promote via yahoo answers.

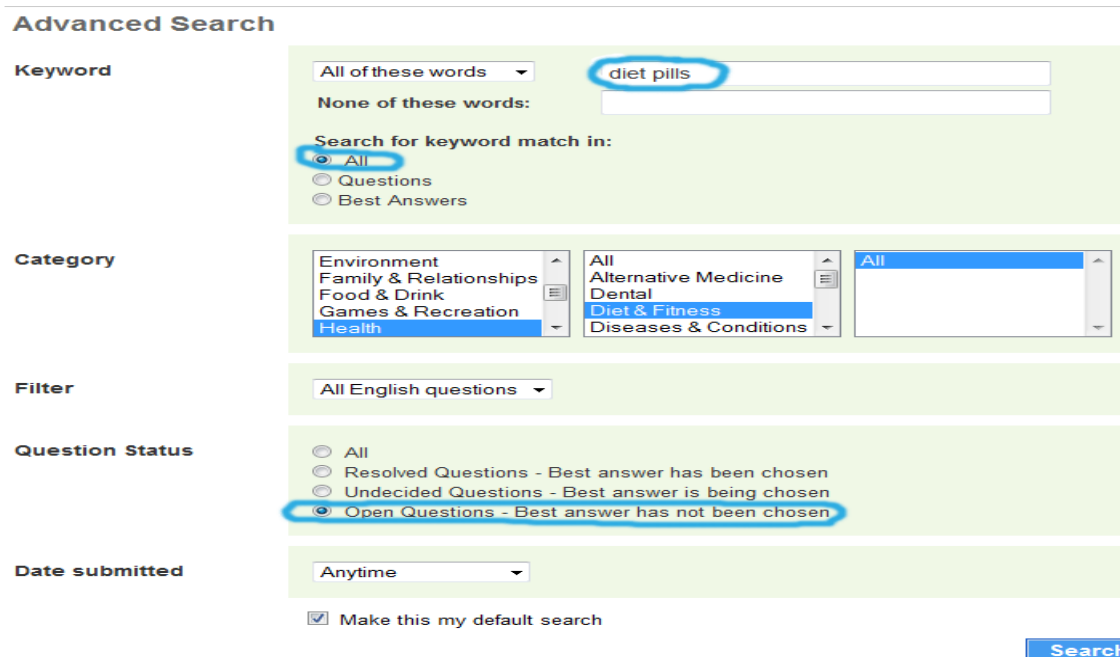

Go to the affiliate programs and have a look what products they are offering to their affiliates. I have chosen to promote [proactol](#) (It is a diet pill product from [MoreNiche](#) affiliate program.

I hope you have now come up with some product, that you are interesting to promote. It's time to have a look in yahoo answers now. Go to: <http://answers.yahoo.com/>

You will see the following search box:

Click on the “Advanced” link (next to the search button) and you will be redirected to the following page:

**Advanced Search**

**Keyword**

**Search**

Now as you can see after clicking onto “Advanced” link I got redirected to the above page. As I have said previously that I chosen to promote the proactol product – which is “Diet Pills”. So I have type in the Keyword “Diet Pills” (see the image). Follow the image and do the same think for your product (just replace “Diet Pills” with what your product is about) and click Search Button on the bottom. I got redirected to the following page that match my keyword:

As you can see their are 69 results which means there are 69 questions related to my keyword which is very good for me ;).

Do a research before you decide to start (should take you only 5-10 minutes max). Now I hope you got the idea of what I was trying to explain and now you have chosen your product.

## Step 1

### Articles

Now you have your product ready so it's time to setup a your website. As I said in my introduction page you will need 10 articles maybe less to put on your website. This articles are needed to provide with as much information for your product. Here is where I get all of my articles done for very cheap rate but also a good quality: <http://www.cyberhubonline.com/>

Order 10 – 500 words articles based on your product. You should get them delivered to your email within 2-3 days after you make the payment to them. I will give you a suggestion to include with your order, when you are purchasing the articles tell them to use some of the following titles for your product:

- What is (your product name)?
- How Does (your product name) work?
- What can (your product name) do for you?

Hope you catch the idea.(you must provide your visitor with much information as possible about the product)

### Website

Now lets say you have your articles already delivered and its time to build your website. I will suggest you to use “WordPress” for your website – it is easy to control thinks and only takes around few minutes to setup.

Find a good quality premium template so your website doest look a bullshit. Here are some of my favorite wordpress themes:

<http://www.themespinner.com/demo/?wptheme=Maya-Free>  
<http://www.themespinner.com/demo/?wptheme=Shiva-Free>

This are my favorite ones so is up to you if you decide to use them.

Now you got your website installed and using one of the themes of your choose – its time to post the content. The themes that I provide you also have images that apper on the homepage. To add a new image go to Google and search for images related to your product. I choose a proactol so I type in google images proactol and I come up with tons of them. Choose the proper image for your article and add it.

I will also suggest you to include some links in your article that refer to your product website.

Now you have your articles posted its time to do a little research. As I have chosen to promote “proactol” I am going to give a example of what you need to research for. “(your product name) discount codes” their should be some available if not your are unlucky. So you have found out some discount codes copy them and go back to your website and make a new page. Called it “Discount Codes” and then paste them in it.

This is the most important think for every product that you are going to promote. Say that you are the visitor to my site and you are interesting to buy the product that I am offering, the first think that you will do is to look for some discount codes. So if you havent got any posted on your website buyer will search on google and maybe purchase from someone else site. :  
(.

Anyway I hope you got the idea of what I was trying to explain to you. It is time to setup few banners on your website (I will recommend you to use no more than 3 banners per page) 1 in the header, 1 in the sidebar and one in the footer or maybe 1 in your articles.

The last think is to install google analytics (I hope you all know what it is about)

## Step 2

Now you have your website and it is ready to be promoted.

Go to yahoo answers and search again for the keyword that's related to your product. You will find a lot of questions. Now let's have a look at the picture below:

The screenshot shows a Yahoo Answers page. At the top, there is a question titled "Mixing birth control pills with diet pills?" asked by a user named Laura. The question text is: "I take Ortho Tri-Cyclen Lo birth control, and I am interested in taking Diet pills. I do work out, I actually just started doing Tae Bo, but a friend of mine said it will mess my birth control up? Any tips and advice would be helpful. Thanks. 3 days ago - 16 hours left to answer." Below the question is a "Report Abuse" button. Underneath the question are options for "Interesting!", "Email", and "Save".

Below the question, there is one answer from a user with a blue profile picture. The answer starts with "Hey Laura." and continues: "To be honest with you there isn't a problem to mix birth pills and diet pills. Personality when my wife was taken them she also got some diet pills and she has never ever feel any think neagative, but a friend of her was in a big dangeour when she mixing them(she was using different ones than my wife) My wife found a diet pills called proactol which havent got any bad negative effects just burn weight. btw: I have search for proactol in google and comeup with this website [redacted] Have a look and see they have much information about them and also some discount codes that i will let my wife knows when she is going to purchase her next order." The answer ends with "Hope that helps" and "Many Thank's". It is dated "1 second ago" and has "0" likes and "0" comments. There is also a "Report Abuse" button for the answer.

On the right side of the screenshot, there is a vertical advertisement for "Pepcid Complete" and a "Categories" sidebar with options like "All Categories", "Health", "Diet & Fitness", "Disease", "General", "Men's Health", "Mental Health", "Optical", and "Women's Health".

Read my answer and get the idea of how my answer will make her look at my site and buy the product. I hope you got the idea of what you need to do. Here is a little list:

- Be creative
  - Always try to answer the best you can
  - Make the Asker think about the product ;)

Here is other example of my answer that have been chosen as a Best Answer:

The screenshot shows a Yahoo! Answers page. At the top, there is a search bar and navigation links for 'ask.', 'answer.', and 'dis'. Below this is a search bar for questions. The main content area shows a 'Resolved Question' titled 'Any diet pills [redacted]'. The question asks if there are any diet pills that work and are not harmful to the body, as the asker has gained weight in the past two years. The asker's name is 'iBElovin...'. Below the question is a 'Report Abuse' button. The 'Best Answer' is provided by the same user, 'iBElovin...'. The answer states that many diet pills are just a waste of money and that the asker has found 'Proactol' to be the best. The answer mentions that the asker has lost nearly 6 kg and is planning to purchase a second order. The answer also includes a link to a website for more information and mentions that there are discount codes available. The answer has received 100% of 1 vote. On the right side of the page, there is a sidebar with a 'Do a li Am Gr' section, a 'Click for m' link, a 'usaf' logo, and a 'Categ' section with links to 'All C:' and 'Heal'.

Do look my answer and think why it have been chosen as a best ? - because is relevant to the question and is giving alot of info to the asker.

Now it is your time to find questions and answer them.

From my opinion of view for every 15 questions that I have answered I got 1 sale which takes me around 15-20 min. to do it maximum.

Good luck to everyone and remember “Always try to be creative”
